

Comfort Plus®

Premium Saliva Ejectors

Perfectly placed suction ports minimize trauma to mucosal tissue.

Takes in Fluid, Not Tissue!

The Comfort Plus Premium Saliva Ejector features a patented tip design that enhances patient comfort (unlike traditional saliva ejectors that can lock onto tissue and traumatize patients). Comfort Plus is engineered with longer rounded edges, smooth surfaces, and perfectly placed suction ports, to protect delicate mucosal tissue.

= NOT MADE WITH NATURAL RUBBER LATEX

Did You Know?
Comfort Plus® is a kinder, gentler saliva ejector that won't lock on to tissue, enhancing patient comfort!

Comfort Plus Delivers:

- Optimum fluid removal
- Uninterrupted light debris removal
- Prevention against blocked suction
