# Shofu Best of Class

## EyeSpecial C-II—An Exceptional Asset for Every Dental Practice

### Product description

Proprietary to Shofu, the EyeSpecial C-II digital camera was developed exclusively for dentistry. The camera achieves predictable and consistent clinical photographs for case documentation, diagnosis and treatment planning, patient communication and education, insurance verification, legal documentation, and dental laboratory collaboration.

Equipped with eight pre-set dental shooting modes, a 12-megapixel sensor, and the cutting-edge FlashMatic

module—a proprietary system of ring and dual-point flashes—this smart camera demonstrates true-color reproduction with an exceptional depth-of-field range.

The EyeSpecial C-II also possesses anti-shake attributes that ensure clear images with each use. The panoramic LCD screen of Shofu’s camera is larger than the displays and viewfinders of typical SLR and point-and-shoot cameras and it can be operated with a gloved hand. The screen employs gridlines that facilitate a proper image alignment, thus reducing

the risk of photographing objects at an incorrect angle.

Navigating the camera is virtually stress free: no extensive technical knowledge is required to work with it, an attribute that will motivate clinicians to delegate photography tasks to their staff members, therefore freeing precious chairtime.

Designed to provide predictability and functionality, the heavy-duty yet ultra-light (weighing ca. 1lb) and sleek EyeSpecial C-II complies with stringent infection control protocols. The camera is water-, chemical- and scratch-resistant, and can be swiftly disinfected with a disinfecting towelette.

### How can this product add value to a general dentist’s practice?

The right camera is a versatile, easily operated instrument that can be used by the whole team to improve practice efficiency, clinical accuracy, and patient acceptance. Packed with intuitive, cutting-edge functions tailored specifically for dentistry, the EyeSpecial C-II helps dental professionals meet the varied needs of their practices and laboratories.

### What made this product Best of Class?

“The Shofu EyeSpecial C-II is the best of class as it is the only camera on the market designed specifically for dentistry. From the customized settings specifically for taking the photographs we need in the everyday to the ability to wipe it down for disinfection, the C-II is the easy to use and best-designed device for the dentist and the staff.”
