PLANMECA
Better care through innovation

3D Imaging

Starting Under \$65K!

The Planmeca 3D product family consists of exceptional all-in-one units. With three different types of three-dimensional imaging - as well as panoramic, extraoral bitewing and cephalometric imaging - these intelligent products can meet all your maxillofacial imaging needs.

Planmeca ProMax® 3D s

Planmeca ProMax® 3D s is an ideal 3D unit for capturing small details. It is perfect for single implant, endodontic, and wisdom tooth cases.

Planmeca ProMax® 3D LE

Planmeca ProMax® 3D LE offers small FOVs and has one of the industry's highest resolutions at 75 µm, perfect for endodontists.**

Planmeca ProMax® 3D Classic

The Planmeca ProMax® 3D Classic imaging sensor covers the whole dentition area, so the unit gives a clear view of the mandible and maxilla.

Planmeca ProMax® 3D Plus

Planmeca ProMax® 3D Plus, offers a wide variety of different volume sizes and is a great choice for any imaging need.

Planmeca ProMax® 3D Mid

Thanks to its wide volume size selection, Planmeca ProMax® 3D Mid handles a wide range of diagnostic needs making it one of our most popular models.

Planmeca Viso™ G7

Planmeca Viso™ G7 CBCT imaging system offers 3x3 cm to 30x30 cm volume sizes and the industry's largest single scan volume at 30x19 cm, covering the entire maxillofacial area.
