

Innovation in Motion Leadership Summit

Earlier this month, Ivoclar Vivadent hosted the Innovation in Motion Leadership Summit. More than 45 key opinion leaders from across North America participated in the event which included trends in dentistry, round table discussions, hands-on training and information about the company's newest products. The program was held at Ivoclar Vivadent's North American headquarters in Amherst, NY.

"We were honored to host this event with such a distinguished group of industry leading educators," said Dr. George Tysowsky, Senior Vice President of Research and Professional Services. "Our group included scientists, university faculty members, dentists, dental laboratory technicians and many other cross-sections of our profession. Sharing information and listening to what the market needs is paramount to our success."
