

FOR IMMEDIATE RELEASE

DMG Offers Two New CE Opportunities for Provisional Restorations

Live webinar and recorded podcast help clinicians enhance outcomes and efficiency

Ridgefield Park, New Jersey – March 19, 2019 – DMG, a leading manufacturer of dental restorative materials and preventive products, announced a new webinar and a new podcast that offer continuing education on the topic of provisional restorations.

At 7:00 pm ET on Thursday, March 28, 2019, David Little, DDS will conduct a live webinar titled “Solutions for Implant Supported Provisional Restorations.” The webinar will focus on a discussion of materials and techniques for direct implant provisionals as well as indirect techniques, including digital technology. The topic will be of great interest to any clinician who places implants, as provisional restorations play a vital role in achieving predictable and successful outcomes in implant dentistry.

Interested clinicians can register for the webinar at <http://dmglearning.com/upcoming.asp>. For those who cannot view the live webinar, it will be available on an on-demand basis beginning in early April at <http://dmglearning.com/training.asp>. Both live and on-demand viewers will receive 1.0 CEU.

In addition, DMG has released a new podcast, “Efficiencies in Fabrication of a Long Term Provisional Crown.” Featuring an interview with Gary Radz, DDS, the episode discusses how efficiency can be enhanced in the fabrication of long term provisional crowns as well as in clinical applications and techniques while delivering excellent outcomes. The 15-minute episode, for which listeners will receive 0.25 CEU, can be accessed at https://vivalearning.com/member/podcast.asp?x_podcastId=115.
