### **ACTEON North America Launches X-Mind Prime**

X-Mind Prime is the latest addition to ACTEON's panoramic and CBCT digital imaging product line. It blends cutting-edge technology with ease of use in a compact design. With X-Mind Prime, high tech is at your fingertips with tools for accurate diagnosis and complete treatment planning.

X-Mind Prime combines 2D and 3D technologies. Using a single sensor, the practitioner can quickly and easily switch between modes. With 24 panoramic and 32 CBCT options, X-Mind Prime covers many clinical applications including implantology, endodontics, TMJ and sinus imaging. Practitioners can also scan 3D objects such as stone models and impression materials, opening up a whole range of new possibilities.

ACTEON Imaging Suite (AIS) software which is Windows and Mac compatible, provides advanced functionality. Intuitive image handling and state-of-the-art tools to simplify implant planning. In addition, customized reports improve patient communication.

X-Mind Prime is a lightweight and compact system that can fit into virtually any dental office. With its intelligent, wall-mounted design, the unit takes up zero floor space. Because the unit is delivered preassembled to the office, it can be installed by a single technician in under an hour, so it is up and running and does not interfere with office production.

Katy Kjartanson, General Manager of ACTEON North America said, "With the addition of X-Mind Prime, ACTEON shows that it has the capacity for innovation and the expertise to become a leader in dental imaging."

Come see the new X-Mind Prime in person at the CDA Presents meeting in Anaheim at booth 1352
