

March 14th, 2021 - The ADA's Code Maintenance Committee recently met and at the end of the meeting took up resolutions to add CDT codes for molecular testing and vaccinations. Both resolutions passed.

The Committee then took up a resolution to implement these 2 new codes with immediate effect, and that resolution also passed—albeit only after heated debate and objection by the payors, but ultimately testimony from ADA, CMS, and select dentists helped the resolution pass. Payors are instructed to implement expeditiously.
