

Dental Dam and Accessories

Upgrade your isolation

Upgrade your isolation...

Now more than ever isolation, by way of dental dam, is crucial to the protection of your patients and staff. Studies have shown that isolation with dental dam can significantly reduce the load of possible infectious air-borne particles and minimize the production of saliva and blood-contaminated aerosol or splatter.^{1,2}

When you choose COLTENE you're choosing unmatched quality. You're choosing a complete line of dental dam and accessories to maximize clinical success.

Benefits

**Reduction of
aerosols**

**Unblocked field
of vision**

**Absolute
dryness**

- › Protects from aspiration or ingestion of foreign objects
- › Reduces microbial contamination by up to 99%²
- › Maintains a non-contaminated field, free of saliva and blood
- › Protects soft tissue from contact with burs and instruments
- › Saves time in the chair by eliminating verbal interruptions, expectorate, and patient repositioning

Dental Dam

LATEX

Dental Dam Latex*

Made of pure, natural rubber latex. Tough and hard to tear, the powdered material is used as a barrier during operative and endodontic procedures.

Fiesta® Dental Dam Latex

Fruit scented for greater patient and staff comfort. Each box contains an assortment of purple, blue and pink colored sheets.

Elasti-Dam® Dental Dam Latex

Elasti-Dam® is an extra elastic and tear resistant latex dam facilitating the application. It is powder-free and has a controlled low level of protein. Patient and dental team are less exposed to allergenic particles and face a lower risk of developing a latex allergy.

*Natural rubber latex may cause allergic reactions

NON-LATEX

Dental Dam Non-Latex

Made of a resistant material with latex resembling retraction properties. Ideal for strong retraction.

Flexi Dam® Non-Latex

Made of a highly elastic elastomer with reduced tension. It's flexibility facilitates its application on tight contact point. Ideal for soft retraction.

Flexi Dam® Framed Non-Latex

Same characteristics of Flexi Dam® but with a convenient, built-in frame designed to fit comfortably around the oral cavity and eliminate time needed to fit a frame.

Dental Dam Clamps

Our dental dam clamps focus on high quality and are manufactured from stainless steel for greater durability. Our aim is to accommodate any dentist's style and make placing clamps quick and easy.

WINGLESS

- A Distal Bow
- B Buccal Jaw
- C Lingual Jaw
- D Beak
- E Contact points

Wingless clamps are positioned intra-orally first and then the dam is stretched over the clamp and tooth. Our wingless clamps are designated with a W for easy identification.

WINGED

Winged clamps combine steps by placing the dam, clamp and frame simultaneously. Once applied, the dam is stretched off the wings of the clamp.

The FIESTA® style clamps are manufactured in a non-reflective matte finish and are color coded for unmistakable identity.

Winged Clamps Gloss Finish

Accessories

Wedjets® Dental Dam stabilizing cord* is a quick and easy alternative to clamps. Available in both latex and non-latex*, this can complement or supplement clamp usage to help keep dental dam in place and maintain a dry, isolated field.

Dental Dam Frames – Multiple styles and materials to choose from:

- > Ostby plastic frame
- > U-shaped plastic frame, radiolucent and autoclavable
- > U-shaped metal frame, autoclavable

Dental Dam Forceps – Manufactured with a comfortable grip, our forceps allow you to safely and accurately position dental dam clamps. They are light-weight and are produced in a matte finish to reduce eye fatigue and glare from operatory lighting arrangements.

Dental Dam Punch – Available in the popular Ainsworth disc selector style, our punch allows for easy handling and precise action.

ORA-SHIELD® Dental Dam Napkins are soft and help avoid direct contact of dental dam with potentially sensitive skin. Made of special, non-woven fabric in multiple frame sizes. These are for use with standard frames or larger sizes with a strap holder. Allows for maximum absorption of saliva, water, and perspiration.

Dental Dam Template - Accurately mark tooth positions on your dental dam for quick and easy placement.

*Natural rubber latex may cause allergic reactions
