

SM Series

BASIC EMERGENCY MEDICAL KIT

Designed to prepare general dentists for common medical emergencies.
HealthFirst will ensure your medications are always up to date.

Peace of mind that you are prepared

SM Series basic emergency medical kits are designed for the general dental practice to be prepared for medical emergencies and compliant with state regulations and the standard of care. The kits are well organized and align with recommendations from the American Dental Association (ADA), Journal of the American Dental Association (JADA) and the HealthFirst Medical Advisory Board.

Always up to date

HealthFirst's Auto-Replenishment Service takes the guesswork out of staying up to date. The service uses smart automation to track the expiration dates of medications and devices and automatically replenishes them before expiration. Dental offices benefit by extending the shelf life of medications, lowering costs, saving time, and gaining peace of mind.

OnTraq

OnTraq, HealthFirst's practice readiness application, reduces the risks, headaches and costs of emergency preparedness and regulatory compliance. It dynamically shows the status of your emergency medical kit and medications. Rely on OnTraq's smart automation for dashboards, reports and task management.

Choosing the right SM Series kit

Do you see a lot of older patients?

If "yes," then we recommend the spray form of nitroglycerin.

Do you ever have pediatric patients at your practice?

If "yes," then we recommend both adult and pediatric epinephrine auto-injectors.

	No	Yes
Yes	SM27	SM30
No	SM7	SM10

Ensuring you have everything needed for emergency preparedness

AED

A range of AEDs for your practice.

Portable emergency oxygen

Oxygen E-cylinders and devices for positive pressure.

Training

Training for emergency medical response and use of the kit.

Your partner for practice readiness
